PROFILE

Albert Redo-Sanchez is a Professor at the Universidad de Zaragoza and a member of the Graphics and Imaging Lab, where he works on non-line-of-sight and transient imaging: reconstructing scenes that are hidden from direct view. His career spans academia and industry, from research at the MIT Media Lab, Rensselaer Polytechnic Institute and the University of Barcelona to leading terahertz technology at das-Nano, business development at Zomega Terahertz Corporation and optical design at Brelyon. He has authored 22 journal papers and is an inventor on 18 patents.

RESEARCH AREAS

Non-line-of-sight (NLOS) imaging · Transient imaging · Computer vision and machine learning · Modeling and simulation · Terahertz technology · Non-destructive testing

EXPERIENCE

Professor · Universidad de Zaragoza — Mar. 2021 – present

Graphics and Imaging Lab · Zaragoza, Spain

- Co-principal investigator in project ENLIGHTEN by the European Defence Fund
- Cohesive framework for non-line-of-sight imaging based on Dirac notation
- Non-line-of-sight imaging in the presence of scattering media using phasor fields (paper here)

Research Scientist · Brelyon — Feb. 2021 – Sep. 2023

Remote

- Patent ideation and writing
- Optical design and simulation

Director of Terahertz Technology · das-Nano — Apr. 2016 – Nov. 2019

Pamplona, Spain

- **IRYS:** non-contact multi-layer thickness measurement for the automotive industry
- **NOTUS:** system for multi-layer thickness and adherence characterization of composite structures
- **ONYX:** system for 2D materials characterization for the semiconductor and materials research

Research Scientist · Massachusetts Institute of Technology — Sep. 2014 – Feb. 2016

MIT Media Lab · Cambridge MA, United States

- Researched and developed the reading through a closed book proof of concept
- Researched and developed new algorithms for analyzing time-domain volumetric data
- Designed compact optical devices for portable eye diagnosis applications
- Wrote research grants and mentored Ph.D. students

Director of Business Development · Zomega Terahertz Corporation — Nov. 2011 – May 2014

East Greenbush NY, United States

- Non-destructive testing applications with terahertz technology
- Prototypes to validate proof of concept applications
- Customers' needs and requirements collection and analysis

Research Assistant Professor · Rensselaer Polytechnic Institute Jul. 2010 – Nov. 2011
Aug. 2004 – Aug. 2008

Troy NY, United States

- Invented a method to analyze terahertz spectra without the need of a reference
- Developed an ultrafast scanner for a fast terahertz imaging
- Developed a portable system for the non-destructive inspection of the Space Shuttle insulation
- Researched non-destructive testing applications with terahertz technology
- Researched statistical and machine-learning algorithms for spectral analysis
- Wrote research proposals and supervised Ph.D. students

Postdoctoral Associate · University of Barcelona Jul. 2009 – Jul. 2010

Barcelona, Spain

- Researched the application of terahertz imaging technology for cultural heritage inspection
- Researched terahertz spectroscopy for pharmaceutical applications
- Established a laboratory for terahertz technology research

Project Manager · Leitat Technological Center Sep. 2008 – Jun. 2009

European Project Office · Terrassa, Spain

EDUCATION

PhD in Applied Physics · University of Barcelona 2004

Barcelona, Spain

SKILLS

Code and data processing: Python, C/C++, Matlab, Mathematica, LabView

Research: Experiment design, execution, data modeling, analysis and reporting; proof-of-concept experiments and prototyping up to a minimum viable product (MVP)

Sales and business development: Customer requirements collection and analysis; relationships with distributors; commercial product development

Design: Zemax, SolidWorks, Fusion360, VRED

Management: Project planning, execution and supervision; proposal writing and funding

PUBLICATIONS AND PATENTS

18 journal papers have been published in journals indexed in Clarivate Journal Citation Reports (JCR). 13 of them (72%) are in Q1 journals and the other 5 in Q2 journals. Journals include Nature Communications (IF 12.124), Optica (IF 7.727), Scientific Reports, Optics Express, Optics Letters, Analyst and IEEE Transactions on Microwave Theory and Techniques. The cumulative impact factor is 70.0, with an average of 3.9 per paper. Five of the Q1 papers are first-authored. Each figure uses the JCR edition for the paper's year of publication and the journal's best-ranked category.

Patents

1. Dehkordi, B. H., Barsi, C., & **Redo-Sanchez, A.** (2025). Methods and systems for programming momentum and increasing light efficiency in deeper roundtrips of folded optics and cavities via time-space harmonics and moiré effects. United States Patent and Trademark Office, Patent No. US-12253674-B2.
2. Dehkordi, B. H., Barsi, C., Ting, I.-H., **Redo-Sanchez, A.**, & Mehta, A. A. (2025). Display and imaging systems with 1D-1D optical surfaces for stereoscopic and monocular depth programming. United States Patent and Trademark Office, Patent No. US-12298511-B2.
3. Dehkordi, B. H., Barsi, C., & **Redo-Sanchez, A.** (2025). Methods and systems for programming momentum and increasing light efficiency in deeper roundtrips of folded optics via axial refraction. United States Patent and Trademark Office, Patent No. US-12216280-B2.
4. Dehkordi, B. H., Barsi, C., & **Redo-Sanchez, A.** (2024). Multipurpose in-vehicle display systems with ambient light sources for integrated HUDs, instrument clusters, and interactive displays. United States Patent and Trademark Office, Patent No. US-12025798-B1.
5. Dehkordi, B. H., Barsi, C., & **Redo-Sanchez, A.** (2024). Methods and systems for programming momentum and increasing light efficiency above 25% in folded optics and field evolving cavities via quantum effects. United States Patent and Trademark Office, Patent No. US-12158583-B2.
6. Dehkordi, B. H., Barsi, C., & **Redo-Sanchez, A.** (2024). Methods and systems for interactive displays with intelligent generative content and tandem computing. United States Patent and Trademark Office, Patent No. US-12099771-B1.
7. Dehkordi, B. H., Barsi, C., & **Redo-Sanchez, A.** (2024). Methods and systems for interactive displays with intelligent generative content and tandem computing. United States Patent and Trademark Office, Patent No. US-12026420-B1.
8. Dehkordi, B. H., Barsi, C., & **Redo-Sanchez, A.** (2024). Methods and systems for interactive displays with intelligent generative content and tandem computing. United States Patent and Trademark Office, Patent No. US-11868672-B1.
9. Dehkordi, B. H., Barsi, C., & **Redo-Sanchez, A.** (2023). Methods and systems for programming momentum and increasing light efficiency above 25% in folded optics and field evolving cavities. United States Patent and Trademark Office, Patent No. US-11774762-B1.
10. Dehkordi, B. H., Barsi, C., Ting, I.-H., **Redo-Sanchez, A.**, & Mehta, A. A. (2023). Display systems and imaging systems with dynamically controllable optical path lengths. United States Patent and Trademark Office, Patent No. US-11662591-B1.
11. Dehkordi, B. H., Mehta, A. A., Barsi, C., **Redo-Sanchez, A.**, & Raskar, R. (2023). Methods, systems, apparatuses, and devices for facilitating stress-adaptive virtual experience stations. United States Patent and Trademark Office, Patent Application Publication No. US-20230191077-A1.
12. Dehkordi, B. H., **Redo-Sanchez, A.**, Andrews, G. M., & Raskar, R. (2021). Methods and apparatus for high resolution imaging with reflectors at staggered depths beneath sample. United States Patent and Trademark Office, Patent No. US-11016309-B2.
13. Dehkordi, B. H., **Redo-Sanchez, A.**, Raskar, R., Aghasi, A., & Romberg, J. (2020). Methods and apparatus for imaging of layers. United States Patent and Trademark Office, Patent No. US-10796190-B2.
14. Dehkordi, B. H., **Redo-Sanchez, A.**, Andrews, G. M., & Raskar, R. (2019). Methods and apparatus for high resolution imaging with reflectors at staggered depths beneath sample. United States Patent and Trademark Office, Patent No. US-10386650-B2.
15. López-Zorzano, A., Etayo-Salinas, D., Fernández-Vallejo, M., Chudzik, M., **Redo-Sanchez, A.**, & Azanza-Ladrón, E. (2019). Method for Characterising a Material with Layered Structure and a Measuring System. European Patent Office, Patent No. EP-3516373.

16. Sinha, S., Park, H., **Redo-Sanchez, A.**, Lawson, M. E., Savidis, N., Rachapudi, P., Raskar, R., & Patalano, V. (2018). Methods and Apparatus for Anterior Segment Ocular Imaging. United States Patent and Trademark Office, Patent No. US-10105049-B2.
17. Moya-Garcia, J. J., & **Redo-Sanchez, A.** (2004). Palpation system for insertion of windows in vehicles. World Intellectual Property Organization, International Application No. PCT/ES2004/000248.
18. **Redo-Sanchez, A.** (2004). Device for separating, lifting and moving aluminium sheets or other non-ferromagnetic material. United States Patent and Trademark Office, Patent No. US-6746063-B1.

TALKS

Invited talks

1. Dirac notation and cohesive framework for non-line-of-sight (NLOS) imaging. Optics, Photonics and Lasers, Valencia, Spain, Nov. 26, 2024.
2. Onyx: a new standard for 2D materials characterization. GraphIn2018 (ImagineNano 2018), Bilbao, Spain, Mar. 2018.
3. Onyx 2D materials inspector. Graphene Conference, Barcelona, Spain, Mar. 30, 2017.
4. Terahertz in art and cultural heritage inspection: present and future. Eastern Analytical Symposium, Somerset NJ, United States, Nov. 16, 2015.
5. Cultural heritage inspection applications with terahertz waves based on reading a closed book. Primera Reunión Mexicana de Ciencia y Tecnología de Terahertz, León, Guanajuato, Mexico, Oct. 2015.
6. Portable open-field terahertz instrumentation. Pittcon Conference, Philadelphia PA, United States, Mar. 2013.
7. Zomega Terahertz Corporation overview. RFIC Panel Sessions, Montreal, Canada, Jun. 2012.
8. Frontiers of terahertz time-domain imaging. Arizona State University, Tempe AZ, United States, Jan. 2012.
9. THz time-domain spectroscopy for food and pharmaceutical applications. Universitat de Barcelona, Barcelona, Spain, Jan. 2010.
10. Terahertz science and technology review. Universidad Politécnica de Madrid, Madrid, Spain, Jul. 2009.
11. Terahertz science and technology review. Universitat Politècnica de Catalunya, Barcelona, Spain, May 2009.
12. Terahertz science and technology for security applications. Upstate New York Electronic Crimes Coalition Conference, Troy NY, United States, Nov. 2007.
13. Sensing explosive and related compounds with terahertz technology: from laboratory demonstration to open field applications. Gordon Research Conference, Big Sky MT, United States, Sep. 2007.
14. Damage and defect inspection with terahertz waves. University at Dartmouth, Dartmouth MA, United States, Jun. 2006.
15. Continuous-wave terahertz systems. Capital Normal University, Beijing, China, Mar. 2006.
16. Sensing and imaging with CW terahertz systems. Quantitative Non-Destructive Evaluation Conference, Brunswick ME, United States, Jul. 2005.
17. Sensing and imaging with continuous-wave terahertz. Rensselaer Polytechnic Institute, Troy NY, United States, Oct. 2005.
18. Terahertz applications in solid state physics. Universitat de Barcelona, Barcelona, Spain, Sep. 2005.

Seminars and workshops

1. Terahertz spectroscopy workshop. EPFL, Lausanne, Switzerland, Feb. 2013.
2. Terahertz instrumentation status and market outlook. 2012 Workshop on Terahertz Science Instruments and Frontier Technology, Beijing, China, Aug. 2012.
3. Practical guide to develop terahertz systems. Universitat Politècnica de Catalunya, Barcelona, Spain, Jun. 2010.
4. Terahertz systems integration constraints. Universitat Politècnica de Catalunya, Barcelona, Spain, May 2009.
